A presentation from the 2009 Topical Symposium:

Energy Security: A Global Challenge

Hosted by:
The Institute for National Strategic Studies
of
The National Defense University

29-30 September 2009

Papers presented at NDU Symposia reflect original research by members of NDU as well as other scholars and specialists in national security affairs from this country and abroad. The opinions, conclusions, and recommendations expressed or implied within are those of the authors and do not necessarily reflect the views of the Department of Defense or any other agency of the Federal Government.

U.S. Air Force Energy Program

U.S. AIR FORCE

The United States Air Force Exists to DOMINATE Air, Space, and Cyberspace for America

The mission of the United States Air Force is to fly, fight and win... in air, space, and cyberspace

Global Vigilance, Global Reach and Global Power

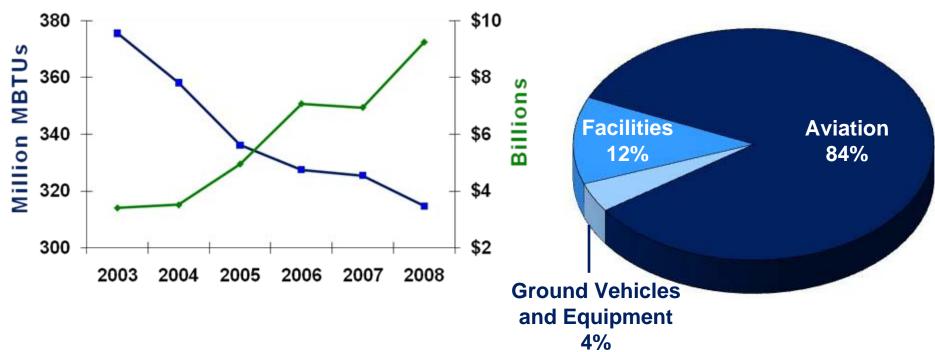

Air Force 2008 Energy Use

Over \$9 billion spent for energy in 2008

Energy Cost Breakdown

Energy Consumption is Decreasing While Costs are Increasing

Energy is a Priority

We can't rest until we harness the renewable energy that can create millions of new jobs and new industries. ... That's how we can grow our economy, enhance our security, and protect our planet at the same time.

- President Obama, 29 Apr 2009

The Air Force energy strategy furthers an energy future that is secure, efficient, and environmentally sound.

- Michael Donley, Secretary of the Air Force, Jan 2009

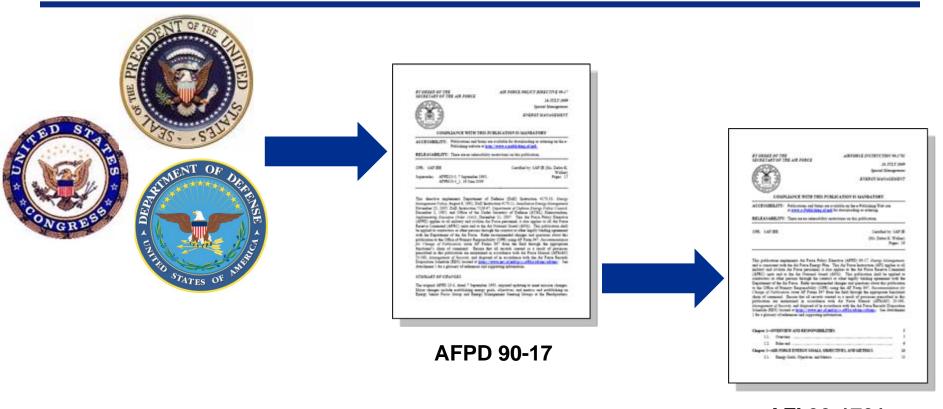

We must continue to identify innovative ways to conserve energy and take actions to build upon our success. Let's be passionate energy advocates, set the example, and remind those around us that our individual actions can make a significant difference in creating a more energy-efficient Air Force.

- General Norton Schwartz, USAF Chief of Staff, Jan 2009

Air Force Energy Policy

AFI 90-1701

Formally Established the AF Energy Program: Strategy, Goals, Objectives and Metrics

Air Force Energy Plan

3-Part Strategy

Reduce Demand
Increase Supply
Change the Culture

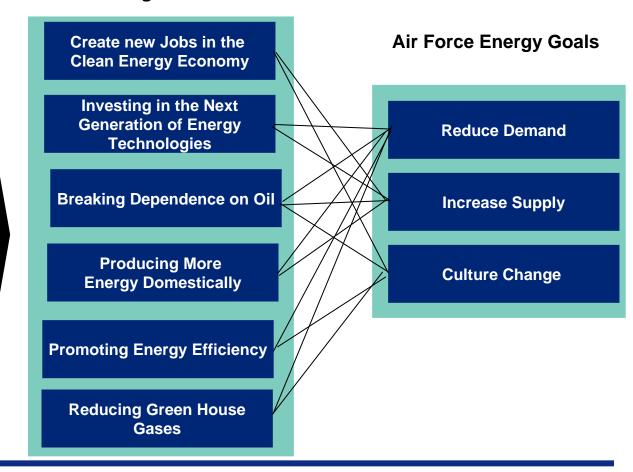

Vision

Make Energy A Consideration In All We Do

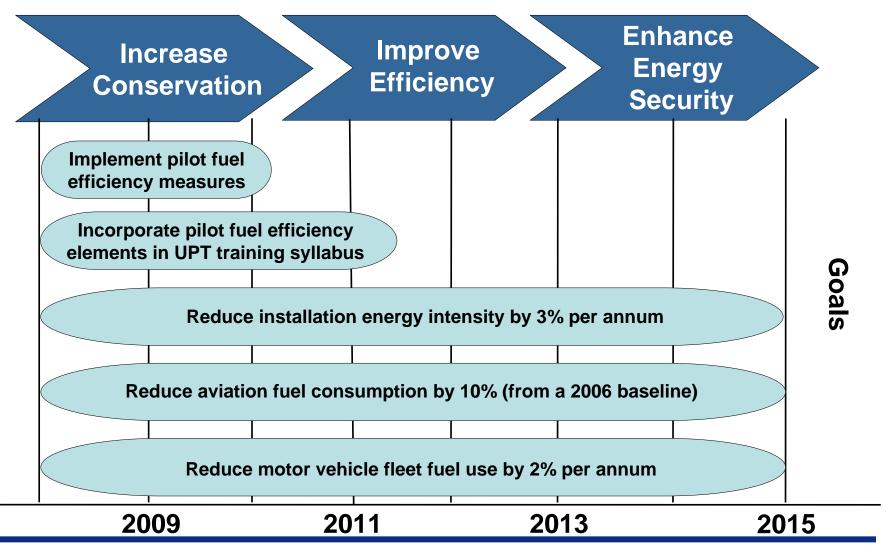

Administration's Energy Agenda

Air Force Energy Program: "Reduce Demand" Goals

Integrity - Service - Excellence

Reduce Demand: Focus Area Initiatives

Aviation

- Reducing aircraft weight
- Optimizing flight routes
- Evaluating training fuel loads

Infrastructure

- Decreasing energy use
- Purchasing energy efficient supplies and low-speed vehicles
- Reducing vehicle fossil fuel use

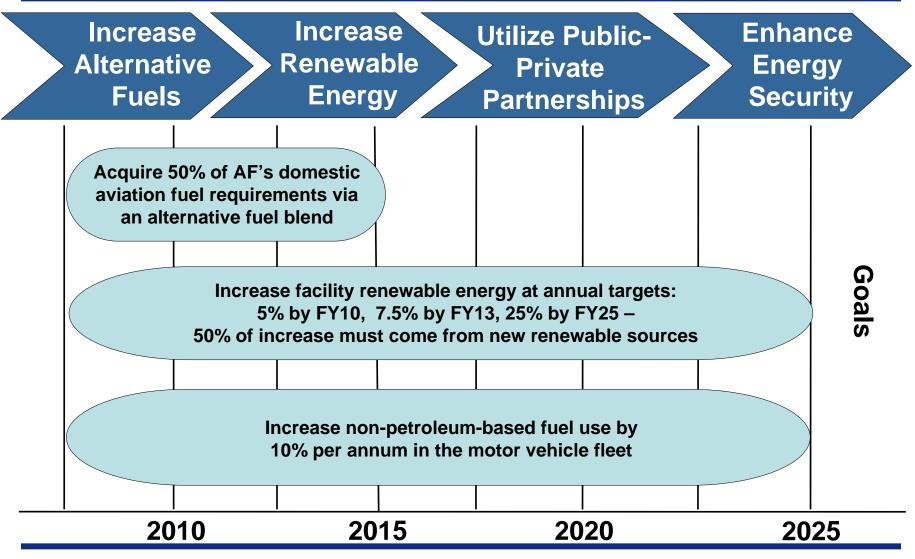

Acquisition & Technology

- Designing more efficient and adaptive engines
- Pursuing more energy efficient aircraft

Air Force Energy Program: "Increase Supply" Goals

Increase Supply: Focus Area Initiatives

Infrastructure

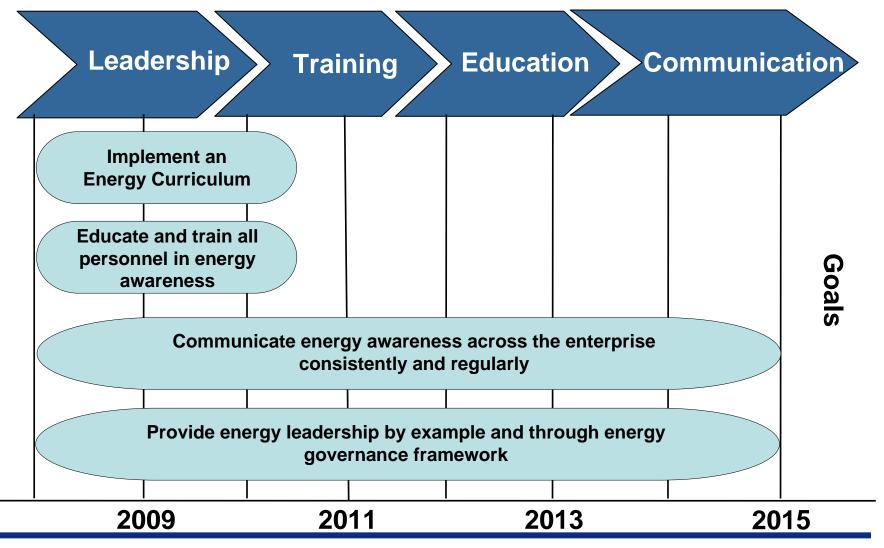

- Largest Federal green power purchaser and 8th largest in US
- Exploring commercial-scale energy projects
- Using ethanol and biodiesel flex-fuel vehicles
- Testing deployable alternative fuel stations

Acquisition & Technology

- Testing and certifying alternative aviation fuels
- Design energy conversion systems to be fuel-flexible

Air Force Energy Program: "Change the Culture" Goals

Change the Culture: Focus Area Initiatives

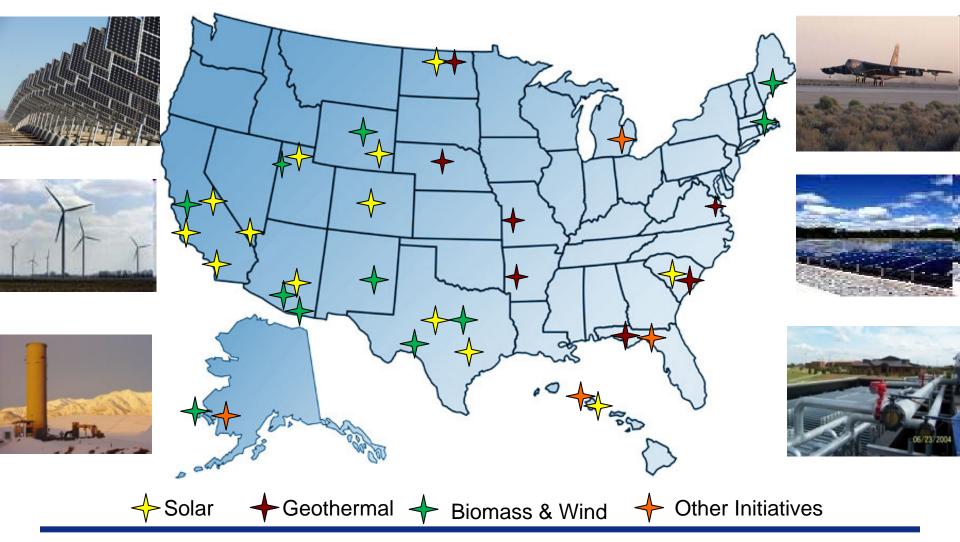

- Make Energy A Consideration In All We Do
- Lead by example, build a movement
- Train & Educate
 - Basic Training, Air University, USAFA,
 Technical and Leadership Schools
- Communicate
 - Measure & publish progress constantly
 - Celebrate success vigorously
- Collaborate with Allies, sister services, agencies, on energy best practices

Lead, Educate, Train, Communicate

Air Force Energy Initiatives are Many and Varied

Air Force Energy: Successes and Challenges

	Aviation Operations	Infrastructure	Acquisitions & Technology
Successes	 □ Aircraft Design □ Weight Reduction □ Simulator Utilization □ Direct Routing □ Air Refueling Optimization 	 □ Facility Energy Conservation Programs □ Metering Plans □ Asset Management □ Sustainable Building Design 	 □ Efficient/Adaptive Engine Procurement □ Alternative Fuels Certification □ Advanced Design Systems □ Aircraft Technology □ Fully-burdened Cost of Fuel Assessment
Challenges	□ Fly more efficiently □ Energy Demand Reduction While Maintaining Core Competencies □ Culture Change	 □ Expand Renewable Energy □ Optimize Assets □ Manage Costs □ Improve Current & Future Infrastructure □ Reduce Energy Intensity □ Grid Vulnerability □ Alternate Fuel Vehicles 	□ Aircraft technology modernization □ Energy Independence and Renewable Energy Procurement □ Coordination with Commercial Alt. Fuel Efforts □ Lifecycle Costs □ Culture Change
